

LoCo Applicator

The LoCo applicator has been designed to allow the easy application of all types of labels and because of its simple design is ideal for products like RFID tabs and multi page labels.

Our unique applicator design is patent pending and our flexible manufacturing methods allow easy modification of the unit to suit your exact requirements.

The LoCo applicator is a no-frills package but still comes with an Easy Servo drive, trigger sensor and an easy adjust rotating mounting slot for 40mm square bar

We have also designed a LoCo stand which allows the LoCo applicator to be wheeled up to your machine and locked in place.

We can also offer a higher specification unit with speed matching and touch screen controls.

As shown the applicator applies outside wound product – for inside wound simply remove the idle wheel below the unwind reel and turn the reel round!

Specifications

Min Label Width:	20mm
Max Label Width:	50mm
Max Reel Dia:	300mm
Core Dia:	76mm
Power:	Single phase 13A

Prices

Applicator: **£3,999 + VAT**

Stand: **£499 + VAT**

LoCo Stand

The LoCo stand is a simple aluminium frame on castors. The Applicator slides onto the cross arm and can be manually moved across into position. It is height adjustable via simple hand tools but the applicator can be easily rotated for small adjustments.

Delivery

Delivery is free on the UK mainland.

Options

Touch screen PLC: Speed matching: Laser trigger sensor: Transparent label sensor
